

When Parisian optician Francis Klein was starting his own boutique in 1970, he found all commercial eyewear collections too typical and dime-a-dozen, and decided to tap into his own artistic interests to create his own line. Handcrafted by artisans in Paris and featuring decorations passionately sourced from around the world, Francis Klein frames are one of its kind – no other eyewear brand or designer produces pieces quite like his.

You can also custom design your very own Francis Klein frame – so that you're the only one in the world flaunting your exclusive creation.

Today, Francis Klein is a family business appreciated by niche eyewear connoisseurs around the world, from Europe to Japan and across the US and Canada, and of course, in Singapore, at very, very select optometry practices.

Classic Cat-Eyes

The Cat-Eye remains Francis Klein's most iconic silhouette, being the reigning style of the early 1970s when he first started. The acetate fronts are carefully injected with an exclusive blend of colors using innovative technology, to achieve such spectacular hues, before decorations such as gems, Swarovski crystals and metal motifs are delicately added by hand.

Classics Re-Imagined In Retro Round

The Fabric Series

Never one to stay stagnant with ideas, another Francis Klein trademark is the embedding of luscious fabrics with the frame, to show off a subtle 3D effect no matter which angle you're being gazed at. Because each frame uses a different swath of the fabric, no two will ever look exactly the same.

Shimmery animal prints

Tribal African patterns

Funky

The Lace and Feather Series

Francis Klein uses a secret method to embed fine French laces and intricate feathers within his frames, elevating the 3D sensation of his pieces to a new level of WOW!

The EXCEPTIONAL Collection

This ultra limited edition line gloriously showcases the rarest antique decorations – a stylish, classy declaration of your style and personality. These can only be custom ordered – no more than 30 pieces each.
